

Homework 1

Matt Isaac

August 31, 2017

Part 1

1. Result in an error.
2. Do something (but not the correct assignment).
3. Result in an error.
4. Result in an error.
5. Make the correct assignment.
6. Make the correct assignment.
7. Result in an error.
8. Result in an error.

Part 2

R and R Studio are installed!

Part 3

1. This makes the correct assignment. I guess the space between the '-' and the '5' is acceptable.
2. This returned TRUE because of the assignment carried out in #1. However, the '==' sign performs a comparison, not assignment.
3. My answer was correct.
4. My answer was correct. (Can't begin name with '_').
5. My answer was correct.
6. My answer was correct.
7. This made the correct assignment. I admit, I'm surprised it worked with the carriage return in there.
8. This also worked and made the correct assignment Apparently the line break doesn't stop the assignment from being made.
